Having just lost her family fortune, Serena must decide whether to settle with her ex or try to battle it out with him. Knowing this, she puts her life on the line and goes to work to clear her name and protect her heart. You know I don't like movies where the main character cheats on their husband or boyfriend. I think cheating is cheating and usually there is no excuse for it. At least I don't think so. I know there are some people who think cheating is okay in certain circumstances but I don't believe that is the case. I have seen movies that show cheating as a way to get out of a bad situation. It's a way to get out from one that you can't stand. But there are many other instances where it is wrong to cheat. It's never okay to cheat to get out of anything. In the movie Cheatin', the main character had tried to explain to her cheating husband why she had cheated. She told him that the reason she had cheated was because she thought he was going to cheat on her and that she couldn't stand it. She was afraid that if he cheated on her, she would never get over it. He was shocked and wanted to know what he could do to stop her from doing it. Her explanation was that she couldn't stand being apart from him and he couldn't stand to see her being with other people. I think the main reason I am against cheating is because I don't want to be in a relationship where I am not with the person all the time. I have never cheated, but I'm not sure I would not have. I
