Spiegel interviewed a group of about a dozen economists, and here is the full list of responses: Response 1: "Elevating minimum wage benefits low-wage workers but, in the end, hurts the businesses that provide them with jobs. It has only a modest effect on employment because employers have little difficulty finding workers willing to work for low wages." Response 2: "These studies show that the effect of a minimum wage increase is largely indistinguishable from zero at the national level. I don't doubt that the experience of some cities and some businesses may differ from this, but it's a good bet that the result of a nationwide study will be the same. As for the economic reasons for this, the evidence shows that the main reason for low-wage jobs is that demand is low. Unemployed people do not want to work in restaurants, fast food stands, and so on. For people who are working, it does not seem to be especially difficult to work for \$5 an hour, or even \$8. Response 3: "The vast majority of economists, including these prominent economists, think that minimum wage increases are not justified." Response 4: "The results for the net effect of a minimum wage on employment are not a mystery. As Thomas Sowell, a conservative economist, demonstrates in his book "Race and Economics," when the economy is in the dumps, workers are all the more willing to take jobs at low wages. The fact 3e33713323
