writersQ: How do I make a slider that works when data changes? I am creating  
a slider that changes to the current month when the slider changes. I have the  
basic UI built but the slider does not update properly when data is added. In the  
demo it shows 6 months on the first slider and 7 months on the second. The  
code for generating the slider is here: `$(window).load(function() {  
window.setTimeout(function() { var month = new Date().getMonth() + 1;`
