

## PDF Split-Merge GUI+Command Line Crack [Latest] 2022

Features: Split by Pages Merge one or multiple PDF files Preserve original links Preserve form fields Split by pages -

If you want to split a large PDF into smaller PDF files by page number, this feature allows you to achieve that purpose. AllPDF Split-Merge will open your PDF files in the Free Previewer for viewing the pages of your PDF file before splitting. If your file does not show the desired pages, there is an option to split PDF file by only these pages,

or to split PDF file by selected pages from this file. To achieve better splitting results, you can leave some of the pages between the splits blank for you to delete. The feature of splitting only selected pages can be used to split PDF files, so that this feature is very useful for split complex PDF files into several files by the given page numbers. Merge

one or multiple files - PDF Split-Merge can be used to merge one or multiple PDF files into a new PDF file. This is especially useful when you want to combine all the necessary pages from several PDF files into a single file. Preserve

original links - Most of the PDF files are linked together by internal or external link fields, if you only want to preserve the internal link fields to be merged or exported, you can enable this feature. The feature of preserving the selected pages will allow you to preserve the given pages of PDF files. Preserve Form Fields - If you want to preserve

some form fields of PDF files or merge PDF files with some common form fields, this feature is very helpful for you to complete this feature. Key Features: Split PDF file by pages number Split PDF files by selected pages Merge PDF

file into a new PDF file Preserve original links Preserve form fields Compatible with Mac and Windows Single-Page and Multi-Page Split Split by pages number To split PDF file by pages number, you can click on the menu of the Split PDF file by pages number, you can either select pages number or select pages range, the lower pages number or range

will be used for split and the higher pages number or range will be used for merge. Split by pages number Split PDF by Pages To split PDF file by pages number, you can click on the menu of the Split PDF by pages number, you can

either select pages number or select pages range, the lower pages
