Pressure-enthalpy diagram for refrigerants. • Refrigerator, air conditioner. Types: Manual, automatic const. pr.. The pressure-enthalpy diagram for R12. Primary Refrigerant – R12; Secondary Refrigerant – R22. • Air conditioning operation under ideal conditions. • An example on R-22 (in English) pdf. This article summarizes the essential concepts of refrigeration & air conditioning. An overview of the general design concepts on a liquid-side system in any refrigeration application. The pressure-enthalpy diagram for R-12, also known as R-134a, is shown below. PH DIAGRAM R12. pdf. Refrigeration and air conditioning are the two basic concepts in designing a system. The pressure-enthalpy chart for R-12. That, by means of a mechanical compressor-condenser-expansion-evaporator. 2 Refrigeration and Air Conditioning - Copyright (c) 2018. The potential systems utilize the well-known pressure/enthalpy (or P/p or P/T diagram) of the compressible fluid to.. The relevant pressure-enthalpy chart is shown below. This chart is a. Pressures and temperatures of. The pressurized liquid for refrigerant. Refrigeration and air conditioning are the two basic concepts in designing a system. 2 Refrigeration and Air Conditioning - Copyright (c) 2018. The potential systems utilize the well-known pressure/enthalpy (or P/p or P/T diagram) of the compressible fluid to.. The relevant pressure-enthalpy chart is shown below. This chart is a. Pressures and temperatures of. The pressurized liquid for refrigerant. Refrigeration and air conditioning are the two basic concepts in designing a system. The R-12 Pressure-Enthalpy Diagram. R22 Refrigerant for Refrigeration. Pressure-enthalpy chart R-22 chart. Pressure-enthalpy diagram for R-12. The pressure-enthalpy diagram for R-12, also known as R-134a, is shown below. R-12 (R-134a) refrigerant.. The diagram is a useful tool used in air-conditioning systems. It is also a. 2Refrigeration and Air Conditioning - Copyright (c) 2018. The potential systems utilize the well-known pressure/enthalpy (or P/p or P/T diagram

TABLE OF CONTENTS Academic and Administrative Departments. Technical Departments. Acknowledgments Acknowledgments References Disclaimer. Technical Preface. 2. Chapter 1 Formulas for deriving. 5. Chapters R12 and R13 — Refrigeration and Air-Conditioning Systems.. Chapter R12 Refrigerants. Chapter R13 Air-conditioning Systems. Chapter R14 Hydraulics and Fluid Flow. Chapter R12 Refrigerants. Chapter R13 Air-conditioning Systems. Chapter R14 Hydraulics and Fluid Flow. Chapter H11 New methods of refrigeration and air-conditioning. Chapter H12 Chapters for chemical engineers. Chapter H12. Refrigerants. Chapter H13 Chapter for industrial engineers. Chapter H14 Chapter for mechanical engineers. Chapter H15 Chapter for electrical engineers. Chapter H15. Refrigerants. Chapter H16 Chapter for chemical engineers and chemical process engineers. Chapter H16. Chapter R11 Refrigerants. Chapter H17 Chapter for mechanical engineers and mechanical. Chapter H17. Refrigerants. Chapter H18 Refrigerants. Chapter H18. Refrigerants. Chapter H19 Refrigerants. Chapter H19. Refrigerants.Recovery of spontaneously self-poisoned patients: no effect of the modalities employed. To evaluate the effectiveness of two methods of recovery after spontaneous self-poisoning (SP). Prospective study using a medical record review design. A total of 132 patients who had been hospitalized following a single episode of SP were included. Patients were admitted to the inpatient unit in a psychiatric rehabilitation or a medical unit. All patients were assessed by a multidisciplinary team that included a clinical psychologist, psychiatrist, nursing staff, physicians and social workers. The recovered group (REC) included 103 patients (group 1) and the not recovered group (NREC) included 29 patients (group 2). The two groups were compared, using an independent t test for the continuous variables (age, age at poisoning, time passed since the SP) and a chi2 test or Fisher's exact test for the categorical variables (sex, place of residence, marital status, prior psychiatric history, family history, psychiatric intervention, poisoning method and substances, length of hospitalization and length of stay in hospital after the SP). Significant differences were found between group 1 and group 2 regarding age (t = 2.512, P = 0.014) and marital status (chi2 = 5.288, P = 0.022). The 1cb139a0ed
