Outcomes of endoscopic management of aneurysm. The aim of this study was to evaluate our surgical outcomes in treating cerebral aneurysms, either by clipping or trapping, and to determine factors predictive of poor outcomes. Over a 6-year period, all patients who underwent surgical treatment for aneurysms were reviewed retrospectively. The study comprised 101 patients. Fifty-eight patients underwent clipping and 43, trapping. Clinical outcomes were assessed by the Glasgow Outcome Scale. The mean post-operative hospital stay was 11.7 days. The mortality rate was 2%. The overall morbidity rate was 15%, and rebleeding after aneurysm surgery occurred in seven patients. Multivariate analysis demonstrated that the presence of subarachnoid hemorrhage and the severity of the vasospasm after endovascular embolization (EVTA) were significant predictors of worse outcome. Seventy-four percent of patients with subarachnoid hemorrhage recovered to a good outcome, while only 42% of those without SAH had good outcomes ($p = 0.012$). The higher the Glasgow Outcome Scale score, the more favorable the outcome. Trapping has a lower morbidity rate than clipping. When possible, surgical management should be the treatment of choice for ruptured aneurysms. Preoperative EVTA can help to predict poor outcome in patients treated by both surgical clipping and trapping. Get breaking news alerts and special reports. Forty years ago this week, the U.S. Supreme Court effectively ended the debate over abortion by striking down Texas' most restrictive law, the one that required doctors to bury or cremate fetal tissue. Twenty years ago, in the landmark *Casey v. Planned Parenthood* Supreme Court decision, the court made exceptions to protect doctors and patients to go about this one way: surgically. At that time, the court accepted a narrow view of when abortion rights were allowed. Even in its defense, the court gave the minority view that abortion was "partial birth abortion," a catchall phrase, but the Supreme Court never defined what constituted this crime. Those provisions were ostensibly struck down 40 years later, but did not go far enough, according to opponents. They wanted the court to declare abortion on demand — or a broad notion of "partial birth abortion," which had

never been used in that way in any states. In October, the court did what the Casey
