Although there are tutorials available for new users of Photoshop, I suggest you first learn how to edit in GIMP — see the "GIMP for Beginners" sidebar. GIMP includes a layer-based editing system and many of the same features available in Photoshop. It's even possible to import Photoshop files to GIMP and then go in and edit them there. Figure 3-1 shows a GIMP file with a number of text layers, all placed on separate layers. The features covered in this book are more or less standardized, but I think I mention them all anyway. You may notice that some features are not covered in this book. That's because I thought I would rather cover the topics in the order in which Photoshop teaches you them. Here's a list of features you'll probably find useful: * Aligning and resizing images * Blending images * Creating drop shadows * Creating and applying effects * Creating and inserting shapes * Cropping images * Controlling size and positioning * De-essing images * Duplicating images * Editing and creating layer masks * Filters (the only exception to this rule is the Level/Curves tool — see the "Leveling and Curves" sidebar later in this list) * Improving performance * Improving color * Locking layers * Locking transparency * Making selections * Merging (or uniting) images * Resizing images * Text * Transforming (moving) images * Trimming images * Undoing actions * Using the Clone Stamp * Using the Brush tool * Using the Clone Tool * Using the Healing Brush tool * Using the Eraser tool Shopping List for Macs and PCs I've written this book for Windows users (in Windows, it's all about layers) and in almost every chapter I include the step-by-step editing instructions for Windows or Macs. However, if you're on a Mac or if you use Photoshop on a Mac, you don't need to worry about these instructions. Although I do mention the Mac's features on the cover of the book, there's nothing in the book that's exclusive to Macs, and you can follow the same instructions on your computer that I outline in this book.

George Stanley George Stanley may refer to: George John Stanley (1911–2002), British pathologist and author George Stanley (footballer, born 1880) (1880–1939), English football goalkeeper George Stanley (footballer, born 1886) (1886–1954), English football goalkeeper George Stanley (journalist), British radio reporter in Brixton, London George Henry Stanley, 1st Viscount Stanley of Alderley (1872–1928), British naval officer and Governor-General of the Union of South Africa George Stanley-Clarke (1899–1972), Lieutenant Governor of British Somaliland from 1957–1959Nearly everyone is familiar with the phenomenon of a flash flood: at the end of a rainy season, when a storm hits, river levels can rise very rapidly. But a small, student-run research team at the University of Rhode Island is trying to get a handle on the precise rhythm of this phenomenon. The team is starting its studies with the eye of a thunderstorm, and specifically, a lightning strike. On April 13, several hours after the storm passed, the team set up an experimental ground station in a small field on the university's North Burrillville campus. This station was a simple metal frame, through which air and water flowed. Inside the box, students placed several samples that would measure things like the ion concentrations of the air, or moisture levels in the soil. However, it wouldn't remain in place for very long. Lightning struck the station, and by the end of that night, all of the samples were gone, scattered by the sudden blast of electricity. The team has now set up a new, more permanent metal box. But even there, they're vulnerable: after a lightning strike on April 29, all of the gear was demolished, and the students are frantically trying to replace it. While the disturbance caused by the lightning may be the most visible, the station's real purpose is to monitor changes in air quality. Ion concentrations change dramatically after a lightning strike, and the team has been wanting to understand what effects these changes have on trees and plants, as well as people's health. "We want to monitor air quality during a lightning event, in order to better understand what the health effects are on the local environment," say Brendon Nelson, a graduate student working on the project, and the lead author of the new paper, which was published earlier this month in
