Q: How do I make angular CLI overwrite its own default styles I'm new to Angular CLI, and I don't know how to overwrite Angular CLI's own default styles so they do not merge with styles from the project. A: if you only want to load your css file you have to use @Component({ selector: 'app-root', templateUrl: './app.component.html', styleUrls: ['./app.component.css'] styleUrls: ['./styles.css'] }) instead @Component({ selector: 'app-root', templateUrl: './app.component.html', styleUrls: ['./styles.css'] }) if you only want to load a css file @Component({ selector: 'app-root', templateUrl: './app.component.html', styleUrls: ['./styles.css'] }) Q: Is there a "transport" channel to STS? I'm just curious to know if there's a way to connect to an STS (Seamless WebSocket Transport, a protocol that's more robust than HTTP) channel via HTTP? E.g. I can set up a HTTP server and simply connect to it from a browser, no problem. I also know that you can use JavaScript to connect to a socket, but I need a pre-existing endpoint to connect to, and that server needs to be serving all kinds of other things. I know that there's a temporary subscription channel you can send messages to on the STS (via /metadata/tempSubscriptions, when there aren't any stable subscriptions available) but I can't find a way to send to that channel from anything besides the browser. There is no confusion as to why you should go for free astrology prediction - if you want to know what your future holds. And if you are wondering why you should go for it? Well, here is why. 1. The Internet - as we already know - is a vast resource that is easily accessible by anyone all the time. The Internet is the perfect platform for astrology predictions because you can easily access them 24/7 from anywhere around the world. 2. The free ones - as we already know - are predicted using algorithms and formulae. 3. As the name itself suggests, the free version of astrology predictions are usually provided for free without the user having to pay. The predictions though are of poor quality and usually inaccurate. So if the "free" version isn't enough for you then you could always opt for paid astrology predictions. 4. If you have a specific date in mind, then your astrologist will be able to tell you what can happen on that day. 5. The paid version - depending on the package you choose - will provide you with more information and there are variations in the predictions. This could very well help you make the right decision in your life by picking the right package or the package that is right for you. And as a bonus, you can make your purchase either on-line or by calling them on the phone. 6. There is no time limit on the ones that are available for you to purchase. So if you wanted to purchase a free one and you only wanted to be able to make your purchase for a specific date, then that is what astrologists can do. 7. Most of the time, you get to speak to the predictions providers directly instead of having to rely on a third party to make the predictions. A provider may well be able to provide you with information that you might not be able to find through the internet. 8. The package may also include a certain amount of time during which you can purchase a specific prediction for yourself. 9. A quality astrologist may well be able to provide you with a variety of free predictions by following up on your birth date. 10. It is also quite possible that you may want to choose a specific time period for your free predictions. The way it works is that you can purchase a package of a specific length and your free predictions are available during that period of time. 11.
