If you're anything like me, you keep a lot of files and don't actually know where you put them all. Have you ever wanted to have a folder where you could 'freeze' a group of documents at one point in time, for example when you're writing a new chapter of your book? Well, your solution is at hand. I'm going to show you how to create a list of documents for later use and then, how to restore them all at a later time. So, to do this, you will need to create a new folder within your Documents folder and then name it 'Freeze'. Next, within this folder, you will need to create new folders for your documents. Again, these will need to be named: Name Date - Date in your current time zone and format as YYYYMMDD Filename - With a .txt extension Within

Description: DVD to VCD SVCD MPEG AVI Converter can encode DVD files to the SVCD, SVCD, MPEG or AVI format. It can also adjust the output video quality, size, and frame rate. This program is ideal for users who want to convert DVD video files for home entertainment or archival purposes, or to easily burn DVD onto VCD (Video Compact Disc). DVD to VCD SVCD MPEG AVI Converter also lets you configure the output quality, as well as define the resolution, image aspect ratio, number of segments, camera angle, frames per second, audio and video bitrates, and volume. Moreover, you can select the subtitle language and optionally enable audio and video synchronization. The VCD-specific settings let you adjust the audio and video bitrate, the camera angle, motion quality, audio and video synchronization, as well as optionally enable VCD with clock offset. The program lets you set the computer to close the conversion once it has completed a task, as well as initiate the conversion process as soon as possible. You can also set the program to disable the computer if it has been idle for more than a defined period of time. DVD to VCD SVCD MPEG AVI Converter can create an output file or save it to the disk as a new disc. It can be used for video playback on a VCD player, or for image display on a computer, and it can produce a DV (Digital Video) file, which can be transferred to DVD or any other digital format.
