The original release was available in the DOS and Apple II, then in 1984 in the Microsoft Windows environment and in 1985 on the Macintosh. AutoCAD was the first CAD application to have its own drawing file format, originally called DWG, later switched to AutoCAD for consistency. In 1985 AutoCAD 2.0 was released, the first version to support computer networked workgroups. In 1990 Autodesk created a new company, Art Technology Group, which acquired the Autodesk name and then added AutoCAD to the name. The same year a standalone version was released for the IBM PC, and in 1991 the desktop and server versions of AutoCAD became part of an integrated system, AutoCAD LT. The first Autodesk product with its own board was the Autodesk MicroStation in 1994. By then it also became available for Unix and OS/2. In 1995 Autodesk released Autodesk Inventor, which evolved from a project of the same name that had been completed by a team of 11 people in 1994. Autodesk released VectorWorks in 1998, a vector graphics CAD tool. In 2002, Autodesk released Inventor 2000, Inventor 2003 and Inventor 2008. In 2003 the Inventor product line changed to a subscription model. In 2005 Autodesk released IndustrySpace, a tool for professional users, and Inventor was rebranded as AutoCAD. Autodesk released Autodesk Move in 2006 and Autodesk Vault in 2007. Autodesk currently sells AutoCAD, AutoCAD LT, VectorWorks, AutoCAD 360, AutoCAD Architecture, Inventor, and Inventor 360, as well as plugins for AutoCAD, AutoCAD LT and VectorWorks. Autodesk also sells the industry-standard commercial or open source programming tools that complement AutoCAD. Every CAD software program is designed to meet the needs of the particular user. Some have the capability to be an effective collaboration tool, others work well on a single user. They are all of different complexity and style and are also sold in a range of price points. "None of this makes any sense, and the people who are responsible are going to have to answer for that," Ryan said during a New York radio show. Democrats' stunning victory in the midterms led to finger pointing among Republicans over what the party had done wrong during the election and in its approach to President Trump. Ryan spoke on WVLK radio's "Ron and Donnie Show," with hosts Ron and Donnie Burgundy. "I don't know why we're so shocked that the American people are sick of Washington, that they are disappointed in our political process," he said. "I mean, they get up every morning in their kitchen and their bathroom and they wonder why the world is upside down." Ryan blamed the party's defeat on Democrats having "thrown a perfect Hail Mary with an evil Hail Mary." "What the [Democrats] did is they said we're not going to do anything about immigration," Ryan said. "They said we're not going to do anything about tax policy. They said we're not going to do anything about health care.... This thing that we said all along was it was about the economy, it was about jobs, health care, this was about them not doing what they said they were going to do, and it paid off." But many members of the GOP blamed others. Ohio GOP Chairman Matt Borges, for example, accused Democrats of picking a fight with Republicans they couldn't win. "They sent a message with these elections -- they picked a fight with Republicans they couldn't win," he told Fox News. "If
