A: There is no need for the update. The update has been done for you already. Remove the \$.getScript("); statements and you can get on with doing what you were doing before you began the update. The only way that line of code to work as it is now, is if you are using local.js, and that is not going to happen as it will not even work on localhost. Pharmacokinetic and pharmacokinetic and pharmacokynamic correlation between cefodizime and the clinical effect was studied. The infected burn wounds were treated with cefodizime or cefazolin, and the concentrations of the drug were determined in plasma and wound fluid. The necrotic tissue was cultured at 24 h, and the number of colony-forming units (CFUs) of the bacteria was counted. The pharmacokinetic studies showed that the levels of cefodizime in blood or wound fluid were much higher than those of cefazolin. The killing rates of S. aureus, S. epidermidis, and P. aeruginosa in the wounds were 2.3, 2.8, and 1.5 times, respectively, higher in cefodizime-treated wounds than in those treated with cefazolin. It is concluded that cefodizime is more effective in eradicating burn wound infections than cefazolin. A field study of allergen content in eight Brazilian cockroach species collected from different locations. The objective of this study was to evaluate the variation of cockroaches in Brazil. A total of 196 cockroaches were collected from various points of Brazil. The adults were frozen, lyophilized, and then vacuum-packed. The homogenized samples were kept at -20 degrees C until use. This study was conducted between February and December

Sony's PlayStation Now service has been criticised by the original developer of Doom, who says he will no longer approve patches for the service because of a lack of communication from Sony. Doom creator John Carmack criticised PlayStation Now in a post on social networking site Twitter, saying that he had lost the trust of Sony. "I no longer want my name attached to a product being released without my consent," he said. "As per my comment below, I will not approve patches for @PlayStation Now until there is a reasonable discussion." Carmack's criticism follows an announcement earlier this week that the PlayStation Now beta would be closed on 31 January. It had previously said that Sony had extended the beta "while we continue to work to resolve the technical issues." It's unclear what issues have been identified. A spokesman for Sony told GamesIndustry International that it couldn't discuss issues with PlayStation Now. Carmack now confirms on his Twitter account that he was discussing "four different 'technical issues' with @PlayStation during beta that ended up delaying it". "Sadly, three of those have since been resolved," he says. "One was a major blocker." "I don't want to be more specific," he adds. "I want to give them the chance to work to earn my trust back." The beta started with a demo of the game running on the PS4. However, the demo was soon taken down, while the service itself started up late on Tuesday, 23 January. "I'm ashamed to tell people this, but @PlayStation blog that now links to an FAQ about PlayStation Now. "We're planning to offer PS Now on PS3 and PS4 on February 6, 2015 at no additional cost. There will be free PS4 software demos as well." As for the PlayStation Now update itself, that is due to be offered for download on Monday, 27 January," the PlayStation blog says. "This will include a host of
