How do I play? Use your mouse to put together the puzzle pieces on the screen. How long did it take to make? I started this project right after I finished my last game, and I had a lot of help from my friend and brother in law, but we both have working day jobs. This was made mostly on my weekends. Where did the ideas come from? I wanted to do something similar to a picture puzzle game, but add something more to it, and also add a new twist to it. I wanted it to be relaxing yet fun for kids and adults. No prompts like we have today, and that's why you won't be able to miss a single piece! Your challenge this time is assembling that seven piece image. Enjoy in this free game, very easy to play and very addictive! What's New 1.5 : Bug Fixes.
