The protagonist of "My Cute Commissar" is a young lady named Tayu. She is a young lady who has just moved into the mansion as the new second-floor tenant. Tayu really enjoys observing the household members with a raised head or a lowered one whenever she can. She especially loves to gaze at the elder sister of the household, Kyah. With her long hair and clear blue eyes, Kyah is really cute. It's really not a secret that Kyah is quite popular amongst the male servants. And on top of that, Kyah is the only living child left of the household. Tayu is rather embarrassed by this fact and she doesn't want to become the laughing stock of the servants. She doesn't want to look like a total fool either. The first thing that she needs to do is to get used to living in the mansion. Luckily, she really likes the domestic atmosphere. She feels calm every time she enters the mansion. Her goal is to adapt to the household as soon as possible. With that said, she really has no confidence in herself. Everything will be fine if she just smiles and doesn't look at them... From The Developer: "My Cute Commissar: Living in the Castle" is an exciting Tower Defense game. Due to the long life of the Castle, various kinds of Monsters start to appear. The Monster is basically a player's worst nightmare, a living creature that was once a castle guest and became a complete nuisance. Because of that, the Monsters start to appear. Because they change shape and become stronger when the player is not looking at them, it is very hard to defend against them. With the parts of the Castle destroyed, there are different types of Monsters that move freely in the Castle. They are called Monsters. Each and every time, you need to take action as soon as possible to protect the Castle. TOWER DEFENSEGAMEPLAY From The Developer: Players can take command of different kinds of people in order to safeguard Castle. The front line, the support line, the back line, etc. are the different lines of defense, and there is different kind of role for each of them. The map is divided by each of these defense lines, and you can freely move the position of the towers in order to form

CATch The Stars Soundtrack Features Key:

Each player assigns or constrains deck positions (maze will remember)

Players can take turns, pass or trade

Two or more players can do the same thing at the same time

Handling a hand with a limited number of cards can be confusing, especially if multiple players be limited. Some consideration of what you can do might be required

Not a King of Tokyo, for example one player can't have a tracking device and be able to eat his opponents chips if needed.

Winner is the person with the most money at the end.

The Game on the Web

The game plays with NetCards. So buy NetCards then add their drivers to your VM Settings (in the property menu) and the game should play fine.

The Art

This is not where art lies, but a route one must take to learn something:

(Often kidults are tripped up by the lack of art in lesson's so avoid it, buy one book about it or keep a seperate art book, at least one...ok, two...) This site is a good starting point:

A little to keep in mind by making this game:

[natural (lizard) scale was used for ages before the human art move happened (obviously the proportions must be tuned to make the game less leathal, fining will not save you...can't save sorry...)] Picking on one thread, the inspiration for the art may have been the symbol of Leonardo da Vinci (or one of his minions), or a graphic design element (like you might find on the cards used in some RPG systems).

What's new:

Plots Diabolical Strategies The Dreamlord is one of the most powerful artifacts in Planescape: Torment. It is rarely described in-game, but it is unclear when in time it was discovered. It appears to have resulted from an unknown civilization, primitive or extraterrestrial, who had fled to the middle earth to escape intergalactic war, only to be cut off from the cosmic flux. The Dreamlord seeks to make use of this anachronism, and has assumed control of the Planescape physics from the Chaos gods, who are obliged to defend the fabric of reality in accordance with the laws of Chaos. As such, the Dreamlord has carefully crafted an elaborate scheme to manipulate the physics of reality to accomplish whatever it might desire. It has done so by giving power to one of its own followers, Pazuzu, who, having been seduced by its power, has become the source of all magic in the Astral Sea. The Dreamlord, one of great patience, has allowed this to occur, allowing it to gradually appropriate all the magical energy of the Astral Sea, enhancing itself and becoming ever more powerful, while ensnaring the mortal inhabitants of the realms who still remember their magic. The Dreamlord holds out, allowing these people to experience a brief taste of their power, and gaining valuable information on what magic they will one day abandon. At present, the Dreamlord is amassing power to achieve a variety of goals, of which its most likely plan is to take total control of the Planescape setting. It is possible that the Dreamlord will conquer the realms one by one, devouring their gods and magical treasures. Alternatively, if it can take enough real estate in the middle earth, and with sufficient force, it may be able to assume physical shape in the midst of the mortal world and conquer it. Or perhaps it simply wants to remake the Planescape cosmos, and hold it to itself. The Dreamlord has, through its manipulation of Pazuzu, corrupted Chaos, making all magic in the Astral Sea subject to its every whim. It is unclear if the Dreamlord still needs Pazuzu, if its control over the Astral Sea is sufficiently complete, or if this just a move to make the Astral Sea an even more malleable realm. Pazuzu is an extremely dangerous ally, however, and almost certainly due to the Dreamlord's profound benefits, its status as one of Pazuzu's high servants, and his authority over all
