Lords of the Black Sun is the spiritual successor to the ground-breaking Mega Man 7. It was also the first release in the Sega arcade-throwback "Arcade Series" and one of the first commercial games to use the MVS system the Sega Mega Drive/Genesis used. It came out in 1995, just 7 years after Mega Man 7.

It also belongs to the unrealistic world where REAL arcade games usually last for only about 10 minutes, making the level length more than a little ridiculous at 11 levels with 2 bosses. I'm sure there's at least one Roger Dannenberg fanboy who would love for this game to be accurate.

Full of fantastic boss battles, awesome sprite-art and an original soundtrack, it is an absolute must-play for Mega Man fans with more than average skills at platforming and bullet-hell action.

1.3.1.0

Structural characteristics of plantar tissue in unilateral cleft lip and palate and their functional adaptation. Twenty pairs of feet from patients with unilateral cleft lip and palate aged 4 to 13 years were investigated. The total amount of subcutaneous tissue and the following areas on the foot were measured: hallux, first and second interdigital spaces, medial and lateral malleoli, distal plantar aspect of the heel and contralateral foot. Fifteen normal subjects, aged 4 to 13 years, were used as control group. In the cleft side foot the total amount of subcutaneous tissue and the subcutaneous tissue of the hallux was significantly smaller than in the noncleft side foot. The interdigital spaces (except the first one) and the plantar foot area of the cleft side foot were significantly larger than in the control foot. The results show that a functional adaptation has taken place in the foot as a consequence of the malformations in the cleft lip and palate.Q: How to set the text on the view of a button? I have a button which has been declared like `tca_button_pick`" type="Emphasized" press="onPick"/> But how do I set the text of the button on my C# code? A: One way is to change the language when the page is loaded and then change the button's text in the press event (assuming your button is wrapped in a Component that has it's own language key). I've been looking at Jekyll lately as a means of building websites I can both work on from within a browser, and to serve via a CDN or Amazon S3. I think it's a great tool and there are many good reasons for me to use it; Jekyll's post processing is very useful, and it's rather neat in a number of ways. I've been looking around a bit to see if there is a plugin that does what I want and have had no luck. My idea is to generate HTML from a template, and then use Jekyll to spit it out into files. It looks like Jekyll is starting to get a certain amount of traction, and I'd like to know what the level of support is for it. I could, of course, implement what I need, but I'd like to know what's the absolute best way to do

What's new in Claus Adventure:

Blue Drifter is a 1981 American romantic action thriller film directed by Alan Birkinshaw and starring Laurence Olivier and Marie Dubois. The film follows two Americans, Nathan and Charlie, who go undercover to rescue a kidnapped scientist from secret North Vietnamese-American scientist Charles Chiang (Olivier) who has turned to Doctor Kwan (Teri Garr). The film was produced by Leonard Goldberg, with a screenplay written by Robert Z'Dar. Plot After the crash of his airliner, the American doctor Charles Chiang announces to his colleagues that he has a "new" submarine, much to the surprise of his American colleague Nathan Martin. When emergency workers take Chiang to a hospital in Ulan Bator, the Mongolian capital, Chiang is found to be unresponsive to treatment. However, over Chiang's hospital bed is an elaborate metal box. After removing a series of plugs from it, the medical team injects Chiang with a previously unheard-of antidote, and Chiang awakens, easily able to talk and stand for the first time in over two weeks. As Chiang recovers at the ward, he relates the story of his military career, first with the U.S. Navy and later a Swiss private company. He explains that he worked on a secret project which apparently went wrong, and from that project, he was able to make what he calls "the most powerful hand grenade in history." Chiang reveals that the device is still being developed and that the United States government has fired him from his job at the secret project. Chiang establishes his goal to use the grenade to assassinate a political ally of the United States by blowing up that person's office. With the help of an English linguist, he records a voice-recording of the propaganda broadcast that brought him to Mongolia; when Chiang plays it back, he learns that his hoax was heard not only in North Vietnam but also throughout the world. Chiang then gives the recording to the North Vietnamese; consequently, the U.S. government plans to rescue him. However, Chiang is reluctant to be rescued, believing that the American government has betrayed him. Chiang asks Dr. Lewis, his medical team, and American security man Ray Maudus to help rescue him, but the men refuse. The next day, Chiang discovers that his Mongolian companion has been kidnapped by another man. After a personal animosity, Chiang gets into an auto accident and runs
