The current review summarizes and appraises all available evidence regarding the management of breath-activated cough with analgesics in children. The available evidence is based on randomized controlled trials (RCTs), which are reported individually in the review, and on expert opinion. Based on the available evidence, many considerations suggest that oral analgesics are effective for the reduction of breath-activated cough in children, and contribute to the reduction of adverse events such as vomiting and aspiration. Only intravenous opioids have been studied in a few large, well-designed RCTs. However, due to the paucity of evidence, these drugs cannot be recommended for the treatment of breath-activated cough in children. There is a need for well-designed RCTs of medications for the treatment of breath-activated cough in children. Therefore, these drugs need to be investigated in children with symptoms suggestive of hyperreactive airway disease (HAD).Welcome Although this website is a bit outdated, we are still providing you a quick place to get the general line-up for the upcoming season. What is this website? The outdoor-ish team is pleased to announce the 2018 Sportsman Series. This is a smaller version of the Sporting Series. The Sportsman Series is available for any pre-qualified, pre-registered rider. Sportsman Series sanctioned racing is offered in four events with half-mile intermediate tracks and quarter-mile loop tracks. What does this website do? We don't know exactly. We thought we'd make some cool videos
