This program enables you to save images as your desktop background. As if that was not enough, the program also allows you to create wallpaper folders, and view them on your desktop. Chage Desktop Background allows you to change the desktop background of any application on Windows 10 regardless of whether it is open or not. This program is designed to satisfy you with a variety of options that allow you to specify the background image of your choice. Chage Desktop Background is a small

utility that provides you with the ability to customize the desktop background for any application. It will work right away, regardless of whether the application is open or not. When you double-click on an application, a small window will open and showcase the desktop background of the current file. You can either specify the image that you wish to use, as well as choose from a few options available. You can change the colors of the background, create a folder of images, and access the folder to change the background of more files.

The program saves a copy of the image that you just imported as a separate file which you can use later to replace the previous image. With every new version of Windows comes a number of changes. Users are often left confused and flustered with the new Windows 10 interface, and some even get frustrated with its new design and implementation. To help people get a feeling of what it is like to use the new Windows 10 interface and its applications and tools, Desks can be set up in Windows 10 that offer users an actual experience of what their new interface

has in store. Included with
the default Windows 10
interface, Desks are those
