

If a ball player takes a run up and strikes the ball towards an opponent, that strike will be more forceful and accurate. If a player is about to be tackled but is ‘underneath’ their opponent, the amount of force applied to the ball will be increased to ensure that the tackle is clean. Creating a more accurate dribble by moving weight and force in the right direction will allow the player to be more confident on the ball, which will allow them to be more unpredictable and effective on the ball. Moving diagonally, or in short bursts, will allow a player to dribble more effectively. Whether a pass is received or cleared will be determined by the player receiving the ball. The technical depth is unparalleled in this FIFA. Player Fit FIFA 22 will allow you to create a balanced and complete player with accurate and realistic movement. FIFA 22 will feature the Tactic Coach, which will allow you to create complex play-styles and tactical options for your team. Experience a fast-paced match with intuitive goalkeepers. A pressure-based goalkeeper system Improved goalkeepers’ recovery system Tackle system that can allow players to escape difficult situations Dynamic goalkeeping specific to real-world conditions including the pitch shape Even the goalkeeper will look more detailed and responsive in FIFA 22.
