The year is 2087, 100 years in the future. 2087 is now known as "The Golden Age" because of the high expected level of prosperity, due to the massive "Caldera", which is a spacetime disturbance caused by an evil alien race. Earth has been rebuilt in a "Neo-Euclidian" style, completely covered with broad concrete paths, and cities of metal and glass houses. The country is divided into three regions: the "Proposition Region", where the people live happily, the "Opposited Region", which is controlled by government forces, and the "Remote Area", which is so far away, no one really knows how to get there. This golden age is short-lived though, because of the unexpected arrival of an evil being called "The Joker" and the consequent Resistance Movement. "Resistance" means "fight back". At first, the only way to resist is to fight the Justice Police with a powerful new weapon called "The Global-R", which is basically a large revolver with built-in high-tech computers, able to hit a target several miles away at almost any speed. The Resistance Movement is still weak, so they desperately need volunteers to help them. Because of their need, they made a deal with us, if we go to their headquarters and bring out the crazy plans for the Resistance's ultimate attack on the Opposited Region. The plans are called "The Global Project". They are written on a bunch of papers with pieces of some kind of black leather, on which is written "The Global Project". The papers contain plans to destroy the Opposited Region by sending a gigantic black hole into it. A black hole is an object which continues to attract everything towards it, ultimately crushing all things it touches. Thus, the Global Project would destroy the Opposited Region.
