Image Drawer is an application that lets you draw pictures and convert them into sketches. The app allows you to smoothly draw pictures with a mouse cursor using a tool that looks almost like real human hand drawings. The application can convert pictures into sketches in three different ways:Â The first is by converting directly from a website or a gallery.Â The second option lets you choose from a set of pre-made pictures that come with the application. The last method to do is to draw pictures from scratch. It can be done in three different sizes:Â 1024×768, 1024×600 and 800×600. You can also optimize pictures by adjusting their size, as well as fine-tuneÂ theÂ edges withÂ a slider in order to enhanceÂ theÂ results. You can also use the tool toÂ drawÂ pictures… Yadis is a simple, elegant and smart calendar software. It is intuitive and easy to use. Image Drawer is a software that converts your pictures into cartoons. It's a very easy way to turn pictures of your own and create these amazing comics with very little effort. Komobi Image Editor is a software to convert and edit the Images or photos and convert them into high-quality Image or Photo. In this tutorial you will learn How to search and delete your Google+ profile posts on Google. Since 2016 Google+ has become a non-existent social platform, and only has an archive of posts and profiles of users that have closed their accounts. In case you have published a post on Google+, this means that you should be able to access it and do whatever you want with it. There are a lot of sites out there that tell you how to edit posts, but it's a little hard when some the posts are not searchable for some reason. That's why I've decided to create this How to delete posts on google+ tutorial, because I think it's a useful feature if you have a lot of posts on your profile. Have a look below and follow all the steps to delete all the posts at the same time. How to delete all posts on Google+ 1- Open your browser and type in google.com. 2- The screen should look like this: 3- Now click the Google logo at the bottom of the website, and change your search type from "All Sites" to "Images". 4- You will be taken to a new screen with Google Images. 5- Click the button titled "More Search Options". 6- Now scroll down to the "Images" section, and click the gear icon located on the right-hand side of the search box. 7- Click on "Show Custom Search" and be sure that the "Also include images" box is checked. 8- Now you should be able to search for all your posts on Google+. Now all that's left is a simple click of the button "Search". Your posts will appear in the "Images" section on the right, and you'll get the option to delete them one-by-one. Simply drag them up and click on the trash can icon to delete them. If you want to remove all of the pictures from your Google profile, you'll have to delete them from the folder. Because the information is deleted, there will be no way to recover it. That's it, We hope you've enjoyed watching this tutorial
