Windows 8.1. I had purchased the license code from the internet but it keeps asking for a .Q: How to build a method that can use two @GetMapping method calls I'm trying to build a method to be called from a @RestController that uses two @GetMapping method calls, however, I'm not understanding the way Spring handles the method calls and this has required me to write an explicit method for the second @GetMapping method call. The problem is that this method has to have no parameters or a simple @ModelAttribute annotation, so I want to pass null or something to the method. @RestController

```
public class XController {
    @GetMapping("/xA") @ApiOperation(value = "/xA", notes = "Get xA") public String
        getXA(HttpStatus status,
            @ModelAttribute("xA") final A xA){ ... }
    @GetMapping("/xB") @ApiOperation(value = "/xB", notes = "Get xB") public String
        getXB(HttpStatus status,
```
