Ratings and Reviews: "I would like to congratulate nitefox and mutland on a wonderful game. The way I have learned how to "play" really go through [sic] my imagination. I've tried it out on different computers and seems to like it the most on Linux. Do you think maybe nitefox and mutland will adapt this wonderful game to the Linux platform? I believe it would be a huge hit and would increase the number of Linux gamers, definitely. :)" "Mutland has a very simple interface and is well suited to video games like this one. It has a very good world, very convenient and entertaining to play. A good idea and good execution of it." "I think this game is amazing, there is an open world, the world is good, there is a day/night cycle and a large amount of quests. It is a very solid gaming experience." "[Mutland] is the most challenging, demanding game I've ever played." "A nice looking game, not too shabby from a developer. The story is generally interesting and it is not that long, at least not enough to get fatigued and bored. The graphics are professional and the gameplay is very much to my liking. There are open-world elements so it is a good concept." "Mutland is a very fresh concept. A game in which the player is the one who must survive against all the bad monsters, by making use of nothing less than their own hands and imagination. This is a great game concept and a great concept to show in a Linux distribution."Rep. Martha McSally, R-Ariz., a former U.S. Air Force pilot, said in an interview with CNBC that she's not planning on running for the Senate in 2020

Rebots is an indie game by Panos Lefebvre, creator of the award-winning RPG-sim, from the creators of Space Invader 3D and the Mac space simulator For the Stars. If you enjoyed playing For the Stars, Simunitions, and the Space Invader game, you're sure to love Rebots. The epic and hilarious adventures continue in Rebots, with a whole new set of procedurally generated adventures. Rebots is a clever combination of simulation, story, strategy, and RPG, spanning all aspects of the art of terraforming in a unique and entertaining way. Rebots (2019) Rebots is an indie space simulation game that blends fun, puzzle solving, simulation and narrative. You are placed in a race against time to change the shape of the asteroid into habitable conditions before the Rebot population take over. Choose a Rebot and use them to terraform the asteroid. They will help you locate, load and use resources in the asteroid. You can also construct power plants, power grids and other buildings that help you improve your operations. The game has over 150 hours of gameplay, including multiple difficulty levels, a number of achievements and side quests and will keep you entertained for a long time. Even though it is a simple game the space simulation and puzzle solving is extremely fun and challenging. “You can not only see about what you can do or become in this Game. You can also decide the destiny of a civilization. In addition, you will know in what he really does not want to hear about the end: technology!” And what is more, you should not allow! No more wasted resources, just technology, and who knows what you can win. Therefore, when you understand that the end is approaching, you must act. This game is only for you. Yes, Magna Graecia is already there, and you can start the game to see it. However, this game is open in time, and you can not trust in his own time. So, not for you! But you see. You are in my time, and you can do things only in this time. Time travel games have been and always will be popular! What do I do, to start? Once the game starts, it is not open in time. Then you can move freely in time and you can choose to interact with some blocks, and you are therefore given the ability to manipulate time. You can learn the truth about the first Dark Knight if you want. Then you can choose how you want to prevent that! It is good to complete the game in one go. Do not do it, then you will only be scratched, and the game is over! However, you must be careful. You have to decide how you want to prevent the Dark Knight from returning to start a new time line. When the game starts, a few options are available. The first options are two time lines that are already open for you. Select the time line you want to start in, the next starts the game in this time line. Each of these time lines is made up of a series of levels. Each level gives you the possibility to advance in time, and you can use the time, or to be able to save time. Each level has a different task. The first task is to open the first door. However, you must ensure that the time is not running out. If the time runs out, you lose the game. Also, before you open the door, you must pay the counter. Once the counter reaches 100%, you can open the door. Opening the door will give you a view of the other world, a new life and the opportunity to restart time to advance to the next level. It is important to think about the consequences of your decisions. The consequences of choosing the same time line will continue to repeat
