#### Orange Defender Download

The app is small and does have a lot to offer - it has a clean and beautiful user interface, a live scanning feature, automated updating that is easy to use, and an affordable price. However, it also has some glaring shortcomings, and all of the above can be improved, especially in terms of reliability and functionality.

**Reliability** The first issue that you should be aware of is that, although the app's interface is easy to use and very pretty, it is just as susceptible to crashing as any other antivirus. However, it's quite easy to tackle this issue; all you need to do is update the app regularly. To do this, there is a link in the main interface that you can click on to start the update process. Along with this, it is worth noting that you will sometimes need to restart the app in order to complete an update. A number of users report that the app can become very buggy if not constantly updated.

**Live scanning and alerts** Another issue is that of the live scanning and alerts feature. Live scanning indicates whether or not a file is safe to use. However, the alert feature only informs you if a program is safe to use or not, and not which exact reason the app thinks it is unsafe. This is disappointing as it may cause issues if you wish to use the app.

**Functionality** Another issue is that of the app's functionality. The app is quite small but does offer several useful features, including a multi-language interface, a virtual shield against malware, an easy-to-use live scanner, and an antivirus database that can be updated online. However, there are a couple of functions that could be improved. For example, a feature that would be very useful is the one that lets you choose the scan frequency. At present, the only choice is once per day, which is not frequent enough for those who do not wish to see the app constantly update. A better option would be 1 time per hour for example. Another issue is the fact that there are no manual scans that are performed outside of the automatic scans. You can install the app manually, but you cannot manually scan something.

**Get Price And Support** Simply try it for free Orange Defender Customer Reviews Very Fast it did a scan in about 30 seconds and stoped every morning at 5:30AM. I can now sleep in peace. Yes its not as good as the biggie soggy dream but still

#### What's New in the Orange Defender?

Stop wasting time with annoying pop-up ads, unwanted redirections or viruses online. Save time, work productively and get rid of the ads that annoy you. Block the annoying advertisements and generate more space on your computer. Just click "Scan" and the ad blocker will do the rest.

**New in BlueBear!** - Block ads in Firefox, Chrome and Opera by installing BlueBear, our most popular ad blocker. You can configure it to block ads by just clicking "Start", "Stop", "Scan", "Ignore...", or "Unblock". You can choose the third party sites to block or ignore from the "Site Options" panel. You can also easily use it in the share bar, bookmarks bar and search bar. It is also integrated with our Pins extension to help you pin easily!

**Video DownloadHelper** - Video DownloadHelper is an all-in-one online video download software. It can download videos from Youtube, Facebook, Twitter, Dailymotion, Vimeo, Metacafe, Break, Veoh, Mega Video, Hulu, Youku, Tencent Video, and other sites. You can pause and resume download, download video in perfect quality, and capture the video from download page. Besides, it allows download completely in different formats like MP4, MKV, AVI, WMV, 3GP, etc. DownloadHelper supports both Windows and Mac operating systems.

**X-Lock Screen Lock** - X-Lock is an exclusive screen saver software that can put you completely into control. X-Lock has a unique concept called RethinkLock which is designed to make the screen saver more effective and efficient. RethinkLock allows you to lock the screen only when you open your laptop and to unlock it when you close the laptop. Any applications running in your OS will be stopped. You can remove the screen saver temporarily and resume the suspended applications later at any time.

**Bug Hunter** - When a program encounters a bug, is there anything you can do? Help the developers fix it. Bug Hunter lets you report bugs in real-time. You can simply copy and paste a bug description right into the program's bug tracker. Your report will be sent to the developer immediately. If the developer is not available, Bug Hunter will email you the bug's details. If they happen to be working on the bug, they will work directly with you through the Bug Hunter system to keep you up to date

---
