Q: Html inline format I have recently just started using jQuery and CSS for it's nice graphics capabilities. I am having issues with formats: I have a page where I want to have a header, which would be separate from the body of the page, and then have that split into two lines. Then I want the header to appear on the top in such a way that the two lines of the header split in the middle, and the logo to appear at the top left and the search bar to be under the logo. Can someone tell me the correct CSS style to format this so it is inline and not the block? Thanks A: For an inline style The Title For vertical alignment see this question  
Inline styles are often discouraged, as they are much less than well supported in various browsers (especially older IE and early versions of Safari). See: Q: Sorting arrays according to another array I'm still working in the middle of something. I can't figure out what to ask. What I have: Array1 has 2 items: array( [0] => 2 [1] => 3 ) Array2 has 6 items: array( [0] => 1 [1] => 2 [2] => 3 [3] => 4 [4] => 5 [5] => 6 ) And what I need to have: Array3 has 2 items: array( [1] => 2 [2] => 3 ) Array4 has 4 items: array( [0] => 3 [1] => 4 [2] => 5 [3] => 6 ) Please, point out the mistake in my code. I appreciate all the help. \$array1 = array(2, 3); \$array2 = array(1, 2, 3, 4, 5, 6); \$array3 = array(\$array2, \$array1); \$array4

The apolipoprotein A-I isotypes are not associated with incident coronary events in a large population-based cohort study. The association between apolipoprotein (apo) A-I isotypes and myocardial infarction (MI) risk has been suggested but not evaluated in a population-based sample. A total of 7,738 men and women (age 54 ± 9 years, baseline CRP 0.5 ± 1.2 mg/dl) without cardiovascular disease were followed for 5.6 years. ApoA-I isotypes were measured by an immunoassay using affinity chromatography and the apoA-I isoforms were classified into three groups (i.e., apoA-I2, 3, and 4). Cox regression analyses were performed with quartiles of CRP and apoA-I as risk factors for incidence of MI. Overall, 290 incident MIs were registered. No significant association between any of the apoA-I isotypes and incident MI was observed in either quartile analysis. In stratified analyses, the apoA-I4 was significantly associated with a lower risk for incident MI only in women (multivariate adjusted HR 0.61, 95% CI 0.40-0.93). Lower levels of apoA-I are not associated with incident MI risk, yet the apoA-I4 showed a significant inverse association with incident MI only in women. The clinical impact of this association is still unclear and requires further study. The Queen's Speech should be used to bring Labour back into the UK, Jeremy Corbyn has said in a clear sign that he is preparing to lead a move to breakaway from the Conservatives. "I am going to go and meet the Queen. We have to use the moment, the great moment of Brexit, to focus on the future of our country," he told the Observer. "I believe one of the first things the Government should be doing is using the Queen's Speech on 19 October to re-engage with the Labour Party on how to deliver a popular Brexit. "We are prepared to be ready for any eventuality, but there needs to be a serious negotiation, a negotiation which has to involve Labour to create that great Brexit deal which will be good for the UK." The jibes will not come as a surprise, coming from a leader who has so far raised the stakes for his relationship with Downing Street by refusing to back down in a
