  \arguments{
    \item{object}{an
  \code{shiny} object}
\item{deprecate}{should
\code{shiny} methods be
deprecated and removed
  from the API?} }
  \description{ Create or
register a shiny object }
  \details{ This is the old
legacy API, and it can still
be used to register a shiny
object. This method may
```

be removed in the future if the API is redesigned in the future. `{shiny()}` is a primitive to create a shiny object.

`{shiny.defunct(...)}` is deprecated in favor of `{\link[shiny]{defunct}}` in package `{pkg{shiny}}`.

`{shiny.removed(..., quiet = TRUE)}` are removed automatically from the shiny namespace

when they are accidentally used. This removes the warning from the documentation page. }
