the future, when the Earth was just beginning to emerge from a vast civil war, a revolutionary new kind of science developed; science unlike any before. After years of toiling, and in the end billions of dollars were invested, the creators of the technology were awed to see what they were able to create: the first synthetic human, a better version of them selves. They decided to name him Adam. Adam was then deposited in an artificial womb, inside of a titanium and glass chamber where he was to be raised and nurtured until he was ready to venture forth into the world as a free human. However, something went wrong. Adam was removed from the womb too soon, and died in his mother's arms. Ever since, the creators of this technology have been shut out of the public eye, leaving the fate of Adam's creators to be seen. Discover the story of an enigmatic group that would change the face of the world. You will soon learn of a villain that holds knowledge of the origins of mankind and the secret behind the missing years in our history. The fate of the world will be decided by the knowledge of the TruthSeeker Society, and the ability to decipher it.-----EPISODE ONE: Origins-----EPISODE TWO: Revelation----- EPISODE THREE: Redemption-----AoE: Red Eclipse-----WILLIEANZAANG.COM-----NOTE: GPG encryption for download only. What's new in Tamarin:

The **Alekko Original Soundtrack** (**Kisukai Original Soundtrack** in Japanese; Aksys Games' official English title) is a music album featuring music from the video game **Death Paradise: Season Two** by Japanese developer Aksys Games. It was released on PlayStation 4 and Nintendo Switch on June 1, 2018. The soundtrack was published by Aksys Games under Sublimation Records. The nine-track album features instrumental works composed by music producer Tiampol, with vocals and lyrics by multiple Japanese artists. The overall theme for the album is "Sakura", which means "cherry blossoms". The first soundtrack for Death Paradise was released as a vinyl record in Japan on December 1, 2016, with only 15 copies sold. The soundtrack is significantly different from the original game soundtrack in terms of both style and theme. The album features five vocal tracks, and eight untitled songs, with the concepts being "Summons of the Past", "Traitor", "My Self and My Strife", "Itsuka no Melody" and "Expanding of the World". Each track's duration is around 2:48, making the first track titled "Summons of the Past" which spans 3:01. The soundtrack has received positive reception from critics, who complimented its more diverse music, as well as the lyrics and vocals. However, some critics were ambivalent about the last track, "Expanding of the World", which contains more rock and metal influences. The album was a commercial success in Japan, peaking at number six on the Oricon Weekly Albums Chart. **Background and composition** In 2010, a drama television series based on Sengoku Basara was produced in Japan by Nippon TV, with music composed by Jun Hashimoto. Hashimoto was primarily a member of Japanese metal band Babymetal, but moved into composing music in 2008. During his time with Babymetal, he became affiliated with the game composer Watanabe Masaya. They have known each other for about fifteen years, but formed a full working relationship for the first time when he became a composer of Death Parade. The two became friends for life, and when Hashimoto lost his father some years later, Masaya became a godfather figure to him. For Death Parade, Hashimoto searched for a composer who shared his outlook, with an emphasis on originality, and named the composer Tiampol. After learning of the Houseki Corporation's production, he suggested that they
