system will rate your character's degree of strength based on the development of your individual skills. Level up your character by selecting special skills or feeding your willpower. The level of your character directly affects how you fight in a battle, how your character reacts, and even how you obtain quests. The level will also determine the number of items you can equip, and the effects of your class/skills.

Three Basic Classes: Fighter, Wizard, and Knight In addition to being an Eladain, you can also choose from Fighters, Wizard, and Knights. The Fighters are a class who are specialized in training, equipped with a blade, and equipped with powerful weapons. The Wizard are a class who are specialized in magic, equipped with wands, and have various spells, shields, and protective item. The Knights are a class who specialize in horse riding, equipped with a knight's armor, equipped with a powerful and strong weapon, and are very strong physically.

Hundreds of Equipment to Collect The number of items increases through various quests, and the knowledge you gain will raise your character's level. You can equip various items, as you wish. To collect items, you go to the town and take quests. • Unique Quick Battle System In addition to the large open map, there are special zones called arenas. You can enter a mini arena to play a quick battle with an enemy one at a time. Quick battle mode is great for socializing and venting your anger.
