The hint: The surface normal points in the z direction. Any tips? A: Every time you write a surface integral, it is a sum of vector dot products (Theorem 1.34). In this case, it is an integral over a sphere centered at the origin, and thus $S = \int_0^{2\pi} \int_0^\pi \mathbf{r} \cdot \hat{\mathbf{n}} \, d\Omega$ where $\mathbf{r} = (x, y, z)$, $\hat{\mathbf{n}} = (x, y, z)$, and $\mathbf{r} \cdot \hat{\mathbf{n}} = xy + xz + yz$ is the dot product of \mathbf{r} and $\hat{\mathbf{n}}$. Thus $S = \int_0^{2\pi} \int_0^\pi (xy + xz) \, d\Omega = \frac{3}{2} \int_0^{2\pi} \int_0^\pi (x^2 + y^2) \, d\Omega = \frac{3}{2} \int_0^{2\pi} \int_0^\pi \sin^2 \theta \, d\theta \, d\phi$ Now a little algebra will give you $S = \frac{3}{2} \left[\phi - \frac{\sin 2\theta}{2} \right]_0^{2\pi} = \frac{3}{2} (2\pi) = 3\pi$

I have to agree with most people that like the box but think something has to change. I would like to know if there are any large companies that make them. dwayne711 Some of the things the box improves would be diagnostics and comfort. I agree with most. And like the box, I prefer and has been great. As for the only thing I like about the box is that it has a lot more info than the old one. I went from a uv charge controller to a i3 and as much as i like the box, I never used the old one anyway so i wouldn't know what it's like. Seems like i'm the only one that likes the box. dwayne711 The box displays such things as filtration, humidity, intake side freon level, and room side freon level. The box used to have an additional input of evaporative freon flow. It would be possible to have two boxes and just use the one that not running. I think it would be nice to have two standard boxes with headers between them for easy running of one or the other. I like to have a uv box and refrigerant box.Human immunodeficiency virus type 1 (HIV-1)-induced expression of TRAIL mediates apoptosis of HIV-infected cells and affects HIV-1 replication
