Buildanauts is open-world construction simulator that lets you run your own construction company! You'll be able to design any structure you like, including homes, offices, and stores. Then, use your resources to build your structures. And, finally, be the boss by running your very own town! 4.5, 10/11/2014 Phil Buildanauts is an incredibly well presented game with a superb art style, audio design and good sense of humor. Anyone who is looking for a relaxing open-world building experience should definitely check this out. 4, 11/20/2014 Jozawa Buildanauts is an extremely polished and addictive game. The simplicity of the interface and immense potential of the concept make this one of the most addicting games on Android. The only downside is the lack of achievements, though. 4, 7/23/2015 Mr. Cimosky Buildanauts is a relaxing game about a guy who is running a construction company. He is always excited when he sees a new build starting, but is morn when he sees an empty one. He is always dreaming about a client that would like to see his company around. In his town, there is a lot of construction starting everywhere. He tries to use his creativity to make his clients get the houses they dreamed about. The game is very simple in the gameplay. But it might be a little intimidating to those who are used to games where you have to do a lot more than a tap on a screen to get moving. It is very addicting, however. The game is divided in a very obvious two different sections. At the beginning you will need to build a home. When this is done, you will be able to go and look at the other houses around. There are some plot events, but there is not a lot of characters. They are all in the small, but very detailed surroundings. The game reminds me a lot of idle hands. The graphics are great. The music is always great. The game could have a lot more character, I would recommend that developers work on the difficulty curve and provide more things to do. The game is very addictive and relaxing, but it lacks many aspects of a game. 4, 10/05/2017 Kieron It's a brilliant app. 5, 12/18/2017

What's new in To End All Wars - Breaking The Deadlock:

First of all, let me say that I'm sorry if I offended the tanking community of Youtube by creating a subforum dedicated to a concept that hardly any people read about on the internet. But that said, I thought it was an important community to have and I figured that you guys would be interested in experimenting with it. So, we all know that Elder Scrolls is all about exploring and travelling and monsters and the degree to which the player is successful in these kinds of activities is a huge part of the gameplay. Well, if you take the philosophies of Paladins and Dark Souls and apply them to The Elder Scrolls, that naturally opens up the possibility of an element of necromancy or ghostly presence - kind of like a ghostbuster in a video game, but he is a member of the Dark Brotherhood instead of just being an NPC because dying is actually totally his thing to do. After playing with Undead Pixel Monks and watching them, I had a few questions which I thought were important to a community of this sort: First, how do we not raid each other's bank altars? Gold-making is just instant and our character selection is limited by our handling of magic so we don't really have a great barrier to entry. Second, what in-character causes undead pixels to come back to the world in a wave? Third, what kind of effects do we get if we have a super high level of skill in necromancy? Fourth, are there any cool/creative ways in which players can use the power of the undead pixels to their advantage? Finally, as an exercise, do you have suggestions of monster types which would benefit from undead pixels? Thanks for taking the time to read this poorly written, poorly laid-out, badly summed-up thing. Feel free to read through and leave feedback, and don't forget to leave input on the forums as well. First, how do we not raid each other's bank altars? Gold-making is just instant and our character selection is limited by our handling of magic so we don't really have a great barrier to entry. I think that each character is limited to a certain number of bank altars. I'm limited to one bank altar per equipment slot, so five in slot one, five in slot two, etc. It can't be as many bank altars on the character so that people can sell or convert many items to gold; I
