Some time after they fought, Elia and Utgar went to a safe spot and decided to rest there for a while. Utgar leaned back against a tree and closed his eyes. He started to feel a cold sensation in his body, it felt like cold water flowing through his veins. Suddenly his head started to ache and he felt dizzy. He panicked and opened his eyes, as a girl he had not seen before was standing in front of him. Utgar realized he was in this ancient, desolate forest, that the cold running water was the waterfall nearby and that the girl was the goddess, Irial.

Irial was gazing at him. "..... "Utgar, you were a warrior from the Dark Dragon Empire, right?" She asked.

"You flew high in the sky when you were about to attack the golden cities with your army, I suppose." Utgar said as he looked down to the distance.

"Suddenly a huge dragon appeared in the sky. It attacked you, right?&

1. Before installing and when your Mac and your PC are on, please download LZL Installer from LZL. 2. Extract the contents of the ZIP file and copy the file "PCLZLInstall.app" to your Applications folder. 3. Go back to the extension page and if you want to download the cracked game, select your Mac OS X version, click the Apple button, select the ELDEN RING icon and click "Download Original". 4. You

should then have a cracked version of the game which you can now install and play. Enjoy! This review was not a part of the paid promotion for the game but I was simply required to mention the review if it is being posted here. This is a great game. I've played for more than a year now and enjoy it very much. However, I did want to point out a few things. First, the staff did a great job of keeping some fun in them, even if the staff are new to the staff and should know better. Second, I do prefer to play single player games. I would really love to play this game with more than two players, but my PC can't handle it. If any of you are playing with more than two players, how are you all splitting the work load, or is it just a very simple case of you all as being one person? The scenario is what makes this game so great. The story, the characters, the vistas, all of it. I have a different perspective from most of you but I still find the game great. It's short in length and in story, but it has much to say. It's all about the vistas and the characters, not about magic and monsters. All of this changes from town to town, so try and go to every town once or twice. Most towns are only a day trip from others. I thought the pricing was pretty reasonable for a game this size. I also recommend this game for anyone interested in fantasy games, whether the new or not. Now, I have actually beaten this game, but due to the fact that the single player mode isn't available in the sequel I wrote a review on my blog about the game as a whole so that you guys might find it helpful. It's in Italian, but should be OK to read with a bit of effort:
