automation Faronics Insight maxiecu 2 ecut.Q: HTTP request from program that already running I want to read the content of a website using a java program that already run on the same machine. I'm trying the same protocol used by curl: but getting the following error.

javax.net.ssl.SSLHandshakeException: Remote host closed connection during handshake Any idea on how to solve this problem? A: You can't do that with Java. You have a few options: Find a way to embed the executable as a child process in your Java app; Write a proxy program using whatever libraries your platform provides (not sure which one you're using now...); If you are able to run that executable on the same machine, you can do this with bash. Something like: `echo "" | bash` or in Java: `Runtime.getRuntime().exec(new String[] {"/path/to/executable"}).waitFor();` 0cc13bf012
