The game, Sumy Shelltris - ICEBLOCKS, is a 2D puzzle game that was created as a concept game and launched on Steam on September 26, 2016. It was inspired by a statement of the question that the game is played: what if, in the Tetris game, instead of ready-made pieces, the player had to assemble them? As a prize, you'll win gold, silver and bronze medals, releasing phrases from great mutant thinkers, in addition, of course, to achievements. The technical development of the game took four months. The game is available in Chinese, English and Spanish languages. About The Developer: IceBlocks LLC company was founded in the year 2010 in Belarus. The founder of the company is Vladimir Potap, who has a master degree in Computer Science and Engineering from Belarusian State University. IceBlocks LLC company is

now in the process of evolution, and is developing games in the genres of puzzle, arcade, action, simulation and rhythm. The developers are working hard, developing fresh and innovative ideas, that will make your play a lot of fun and have a positive impact on society. Game Reviews: "I really loved playing this game, it's so much fun, it's a plus to have a cool game like this in the store. Something that I enjoyed playing, even though I was never good at it." "Some games I played there were very good, but there was one that was outstanding, that I want to tell about. It's a simple game, but it's fun and addicting for sure." "This game has a little bit of everything, and if you like variety in games, you will find a fun one here" "I think I am in love with this game, it's so addictive!" HOW TO PLAY Sumy Shelltris - ICEBLOCKS is a simple and intuitive puzzle. You can play in two modes: practice and

challenge. In practice, the player will win a maximum score, only 3 points that may achieve through special combinations. In challenge, you have a choice between three rounds and nine levels. The player can start from the first level, choose the difficulty and see the progress of the game in the page.

This has nothing to do with in game character skin or anything else. This is a test pack for the mod. There are three new in game characters. Sakuya Izayoi The maid of Scarlet Devil Mansion, Sakuya is the main heroine of the story. Suika Ibuki An ordinary young woman who is popular at the Night Parade, Suika doesn't have any magical powers. Koishi Komeiji Suika's good friend. Like all others in Gensokyo, Koishi has no magical powers. =====

===== Each character has a special item, a companion, a world, and a specialty. =====

=====

Sakuya Izayoi The Maid of Scarlet Devil Mansion Rocinante's servant girl. Her mother, the author of "The Exorcist," was the sole pupil of "Gakushu the Philosopher".

Komeiji (Shyamly Shitei) Unintentionally Closed-Hearted Satori A cowardly child. Because his mother is a fan of "Akumu no Sensei" and "The Ninja Saga", Shitei is always thinking of his mother. However, Shitei's mind was broken by "the darkness" and Shitei's mother will return to the original world. Ibuki (Yuyama Kusako) Gensokyo. Kurofune's village girl. The daughter of a witch and a fisherman. Being good at making sweet potatoes, Yuyama made them a commodity. She is the one who played the flute and sent "the 100 little monsters" on their way to Gensokyo. Komeiji The goddess (Yasha) of the stronghold. She often appears and disappears. She will take care of Komeiji when they are in danger and she gives Komeiji some medicine. Suika Ibuki The Mother of Crimson Flames The red flame which rules the ghost hall has appeared. Because she is a talented musician, she and

her band have taken over the Crimson
Flames. Koishi Komeiji The Second Takatsuki
The moon hides the power of the legend of
the goldfish. Komeiji is the best of

What's new:

Is now complete. This year, we find ourselves in a new time, a new place. Things are getting weird and the question is, how will you handle it? Will you play tactically, find the best route to victory, or maybe even get into a fight? This is the one game for all fans of strategy and tactics. The Galaxy is weird. And that is our start point. Then, in amongst all this complexity, you must discover what role each of your cards play. No? Okay: Security, Media, Banking, and Security, Media and Banking, then a piece of mixed Media. Far off to the side you see the rest of the cards in the deck. They all have a special ability. The event takes place on the moon. What Moon? Well, one of the neutral planets. We can assign players to either one of these worlds; or to the Earth. Pick the planet you wish to start on. Round up all of your cards and then place them on the table. You want to have the most cards on the table, so you might want to shuffle it once into a new deck. Have all players take 9 of these cards. When I say "9", I mean that it should be 9 of each card type. There will be a round of player action. You roll the dice and move the players around. They can cycle through the deck, place down new cards, swap out a card with another, and so on. I will keep track of the number of cards you have, and how many cards each player has. It sounds complicated, but it isn't hard. If any of you want to give me a hand (or sometimes, two), just email me at capaday@gmail.com and I'll help you out. We are all friends here. Apologies for the uncharacteristically slow writing here at The War of the Butterfly. Oh, well, saving time isn't all that pressing. Onwards! Aaah, but wait! There's someone else here! They are

possessed! Aaaaaaaaaaaaaaaaaah! Hi! I'm back on The War of The Butterfly again. Here, I'm going to be explaining everything that has happened in the last Battle Edition, and the last few few days. As usual, we must start with the basics. (Or we'll die.) Let's go. 2016 is here - the year of the Dragon. After

SMAC makes use of the beloved Call of Duty engine (you know, the one that was made by the people who made that movie where most of the weapons were covered in blood and there was a scene where it said "Would you like to buy a ticket to this amazing movie?")and a story from "Tom Clancy's Splinter Cell"'s Tom Clancy's Ghost Recon. But all of the frantic multiplayer action of Call of Duty, and the character development of Splinter Cell are missing from the SABOW package. ".Oooh, you mean the special forces guy? He's an assassin? You're a hunter?

You go behind enemy lines and assault posts to gain intel? I am a soldier. I run around like a jackrabbit, and I shoot the enemy. It's a real battlefield game."

IGN About This Game: To be honest, I didn't know what to expect when I jumped into SABOW. I downloaded it, plugged in my LiveSteam log-in, and jumped right in. I was never sure whether I was going to have a good time. But it's been a lot more than a good time, so I think I'm going to have to make a longer list. "This is all very cool. It's like Splinter Cell, Call of Duty and Tom Clancy's Ghost Recon, all in one game. No, that's not right. It's like Splinter Cell, Call of Duty and Tom Clancy's Ghost Recon, and they all put that st together in one game."**

Eurogamer About This Game: Well, if it ain't Tom Clancy, it ain't nothin'. The

SABOW game is a real Battlefield clone. It's got some of the shared IPs from the Playstation 2, Xbox, and PC Ghosts titles, and makes full use of them. If you're a big fan of the series, I think you're going to be quite comfortable with it. "I played it today for a few hours and I had the most fun I've had with a game in a long time. I'm really enjoying the map rotation and the fact that it's scalable to your specific personal preference.💎"
