UNPUBLISHED UNITED STATES COURT OF APPEALS FOR THE FOURTH CIRCUIT No. 18-7469 JOE L. ROGERS, Plaintiff - Appellant, v. PAMELA WALSH, Defendant - Appellee. Appeal from the United States District Court for the Eastern District of Virginia, at Richmond. Henry E. Hudson, Senior District Judge. (3:16-cv-00462-HEH) Submitted: November 30, 2018 Decided: December 7, 2018 Before WYNN and RICHARDSON, Circuit Judges, and TRAXLER, Senior Circuit Judge. Dismissed by unpublished per curiam opinion. Joe L. Rogers, Appellant Pro Se. Unpublished opinions are not binding precedent in this circuit. PER CURIAM: Joe L. Rogers seeks to appeal the district court's order dismissing his complaint without prejudice for failure to comply with Fed. R. Civ. P. 8(a). We dismiss the appeal for lack of jurisdiction because the notice of appeal was not timely filed. Parties are accorded 30 days after the entry of the district court's final judgment or order to note

an appeal, Fed. R. App. P. 4(a)(

What's New In Adobe Photoshop 2021 (Version 22.3.1)?

1. Field of the Invention The present invention relates to a zoom lens and an image pickup apparatus having the same. In particular, the invention relates to a zoom lens suitable for use in an image pickup apparatus such as a video camera, a digital still camera, a silver-salt camera, a broadcasting camera, and a monitoring camera, and an image pickup apparatus having the same.

2. Description of the Related Art There are known various types of video cameras. For example, there is known an image pickup apparatus in which two to three zoom lenses are arranged in order from a first lens to a third lens. Moreover, there is known an image pickup apparatus in which two zoom lenses are arranged in order from a first lens to a third lens and a zoom lens is further arranged in order from the second lens to the third lens. Japanese Patent Laid-Open No. 5-321517 proposes a zoom lens in which a first lens unit is of a fixed-focus type and the

first lens unit is moved to effect zooming. Japanese Patent Laid-Open No. 5-321517 proposes a zoom lens in which the first lens unit is divided into two or more lens units. Japanese Patent Laid-Open No. 9-3981 proposes a zoom lens using a second lens unit. On the other hand, there are proposed various constructions of compact zoom lenses (optical systems) having high zoom ratios, in particular, of six to seven. However, a high zoom ratio has increased the number of lenses, so that it has been difficult to reduce the overall length of the zoom lens while maintaining a high zoom ratio. Generally, in an optical system having a high zoom ratio, a lens unit close to an object side is moved for effecting zooming, and a lens unit close to an image side is moved to compensate for image degradation during zooming. According to the construction disclosed in Japanese Patent Laid-Open No. 5-321517, the first lens unit is divided into two or more lens units. Thus, the first lens unit is moved not only for effecting zooming but also for compensating for image degradation during zooming. Thus, it has been

difficult to reduce the overall length of the zoom lens. According to the construction disclosed in Japanese Patent Laid-Open No. 9-3981, the second lens unit is used for effecting zooming. Thus, it has been impossible to reduce the overall length of the zoom
