OMORI is a multi-faceted game. It is a visual novel series which has a unique story and stylish anime art style. It takes place in a world where humanity lives side by side with fantasy creatures called "Fairies". Playable Character: You are a "Sorcerer" - a half-human, half-mortal being who can both see and talk to the "Fairies". In order to lead a normal life, this world needs the fairy hunters and the fairy hunters need Sorcerers, it's a perfect symbiosis... John-kun Hate to break it to you, but I did do the route. I think it's the same thing as doing that of Kousuke or Shiro(if you did the route of Shiro) except I think you did mostly a route that involves Mugi and a character I believe was Kazuaki. At least that is what I think of what happened since I heard a lot of people talking about it in the Bouncy Castle Daily, and I think Shiro might be the main protagonist, but to be completely honest I haven't read any of the manga, and I don't plan to do so. But I know someone who does plan on starting reading the manga in the near future so I don't think it's a problem. So no, I didn't do this. choco Like said it's only a casual playthrough as I didn't get the whole idea that there's more then the starter path Michael Edson I didn't get the chance to play it until I watched their side game show along the lines of the Ani-Game show. It seems to be quite a popular thing to play the route. If it's not right for you then there is no point in playing. Michael Edson Some people have nothing better to do than make up titles for something like this. I just wanted to put this out there. I'm not into Japanese games because I don't understand them. I'm just sure what they're doing is just a complete waste of time. choco So, I started playing with this game (I'm sure it will be released for PSP soon, but I haven't)

Dearest heart didn't realize that he was not wearing his security blanket (I don't think it was his genuine security blanket- An analogy for one of his bs game nights). His friend came back to the house and was talking to Dearest heart because she didn't hear him come home. Dearest heart then realized that his security blanket was by the couch. (Mom isn't home much because she is working all the time). If he had had heard her come in, he would have put it on in the past 15 minutes. The friend then said goodbye to Dearest heart and went over to her boyfriends house. Then Dearest heart turned off the tv (They are 2 steps away from watching tv)and started his walk home. He passed out on his bed (in his friends room, which is next to the steps to go home) and his friend heard him come in and watched a horror movie with her boyfriend. A couple hours later Dearest heart woke up and got ready for work. He put his security blanket on his pillow on the couch and began to put on his clothes. Digest: The Week Of 9.02.2013 Month by month since 1973 we have been posting our in-depth reports on the sociopolitical, military, and military spending trends of every country in the world, as well as exploring the trends and developments of the world's intelligence agencies and their activities. This digest focuses on the events and developments of September. The largest event occurred on September 8, when Ukraine's snap presidential election produced an overwhelming majority for pro-Russian Viktor Yanukovich, in a vote that was widely condemned as fraudulent. On September 15, the victorious Yanukovich demanded greater autonomy for the Ukrainian provinces that border Russia, as well as a hard-fought deal on the status of Crimea, which then was ethnically Russian, but has a large ethnic Ukrainian minority. In response, Russia slashed natural gas supplies to Ukraine's already economically ravaged eastern provinces, and Crimea's large ethnic Russian majority seized control of Crimea's local authorities, civil servants and broke away from Ukraine—incidentally first electing an ethnic Russian as their new leader. On September 16, after three days of international tensions and an attempt by pro-Europe Western bloc demonstrators to storm and occupy the Crimea's regional parliament building in Kiev, Yanukovich, under heavy pressure to make concessions to a pro-Western group that increasingly dominated the Ukrainian national media, began signing a controversial extradition agreement with the European Union. The EU deal was complicated by a Kiev Supreme Court ruling that Yanukovich had exceeded his legal limits for emergency decrees and that he could be impeached if the deal were finalized. And in a seemingly uncalled for and entirely unnecessary escalation of tensions with the United States, who had been supporting the pro-European movement in Kiev, Yanukovich told a gathered group of parliamentarians on September 17 that he was resigning as head of Ukraine and was leaving for Russia. Yanukovich's decision to shift policies from "neo-Soviet" to "neo-Russian" made the post-cold war era look officially back to the cold-war era. As the ensuing political crisis unfolded, fear in Kiev was palpable, though not revealed to the public. Based on the split data from polling conducted near the time by the respected Kyiv International Institute of Sociology—which collected 22,000 responses—which showed that Yanukovich was behind by a 50-30 margin, Reuters reported that for one, pollsters had predicted Yanukovich's victory. The poll numbers were based on
