Extract the PSCAD installation package. Run the setup program. Select all the components except CAD as "Add". Press "Ok" to run the installer. Install. Click on "Run". The installation may take some time. When the installation is done, click on "Next". There will be no PSCAD icon in your programs. Click on "Next" to skip the test. Click "Finish". Now you need to configure. Click on

"Setup configuration" to configure. Click on "Configuration" to configure. Choose PSCAD version: "AutoCAD-2011". Click on "CAD" and click on "AutoCAD-2011" and click on "OK". Click on "Finish". Now, we need to edit the registry to activate PSCAD. Click on "Edit" to edit the registry. Click on "Windows" and choose "Administrator" as "Registry value". Click on "OK". Now the application is activated. Now copy the serial number from

the generated key file "GDXJNDS1.REG" to PSCAD's Autocad menu. Click on "AutoCAD" and then on "Programs". Copy the serial number and paste it. Click on "CAD", press enter and click on "OK". Now you can run PSCAD. If the application is not activated, repeat the steps from 1 to 10. Now we need to activate PSCAD for AutoCAD. Click on "AutoCAD" and then on "Options". Scroll down and select "CAD User/Program Manager". Click on "More". A

window will open. Click on "Activate Program". You need to enter the serial number again. Click on "OK". Now you need to close PSCAD and Autocad. Run PSCAD again. If the application is not activated, repeat the steps from 1 to 10. Open the command prompt and type the following command: "Reg Add HKLM\Software\Autodesk\PSCAD\4.01\GDXJNDS1 /ve". It will open the registry edit window. Type the following as a new value: "GDXJNDS1".

Type the following as a new value: "0000011201012345".

What's New in the?

Markup Import and Markup Assist is the new feature of AutoCAD for Windows and AutoCAD LT for Windows and Mac. With Markup Import and Markup Assist you can review feedback from external sources, such as sign and architectural drawings and improve your drawings in a matter of minutes. This is a new feature for the 2020

release of AutoCAD and AutoCAD LT. Comments from printouts or PDFs, such as T-squares, color-coded, scaled and annotated dimensions, text notes and other comments, can be imported into your design in a matter of minutes. You can store comments from external sources in a user-defined comment category, which is accessible in any drawing. Simply click the Markup Assist icon to start importing comments from printouts or

PDFs. External sources are automatically imported as comments, so you don't need to import the source separately. You can optionally add notes to a comment category and associate a color to the comment category to show the status of comments in your drawing. The colors used are customizable in the user interface. The comments are imported in the order in which they appear in the external source. You can also control the display order of

comments. You can specify the order in which comments are shown on the screen and in the drawing. Markup Assist is available as a feature of AutoCAD LT for Windows and AutoCAD LT for Mac.

AutoSave: Automatically save your drawing whenever your input changes. The saved drawing is automatically loaded when you open it again, and your changes are applied without requiring you to close and reopen the drawing. You can use

AutoSave to save your drawing, either every time you change a feature, such as a line, a point or a circle, or on specific events, such as when you insert, delete, move or resize a feature. You can also choose whether to use the same file name for multiple saves, in case you need to revert to a previous version of your drawing. In addition to its time-saving functions, AutoSave offers you the option to save a drawing with the AutoSave on/off option (this

option is available in the Drawing Menu). The AutoSave option is available in the Drawing Menu and in the Insertion Bar. Custom Color Tables: Printing on paper is very convenient for designers. However, the colors on the paper and in the computer screen can
