Launch X-431.Q: Php Functions/class to manage products in a cart My website will have multiple products, each one with a different price. I found a website that has some standard code for managing the cart, and I'd like to try to adopt it and to use it as much as possible in my next project. Here's what I've found: I can manage all the products with this code: public function getCartList() { $sqldatabase = Database::getConnection(); $products = $sqldatabase->prepare("SELECT * FROM products ORDER BY id DESC"); $products->execute(); while ($row = $products->fetch(PDO::FETCH_ASSOC)) { $product_id = $row['id']; $product = new Product($product_id); $cart_list[] = $product; } return $cart_list; } But how do I use the Cart object in it? Can anyone point me in the right direction? A: Ok so I made a class for my cart list. It's a little bit "heavy" but it works like a charm. It can be found at I was a little bit confused by the code inside the "getCartList" function and was not sure if it was a static method or not. I finally decided to use a static method and now it works like a charm. , subdivision (a)(10)(A)(i).
