The front page is a site mainly to inform you about our products and pages inside the site can be used to download our software, though some pages are just for fun, if you like, you can click on the links on the bottom of any page to get the links for software and other fun stuff. Nov 18 Nov 16 Announcing Octopus v3 Octoplus Octopus v3 Octoplus Octopus v3 is a feature rich application designed to monitor the activities of your Octopus devices and alert you to security breaches, reset all the gateway's on all Octopus devices or even lock the network down so you can easily give remote access to your partners and trusted users from your Octopus devices. Octopus Octoplus v3 is based on the OctoSPI provided by Octopus, OctoSPI allows Octopus v3 to control and monitor all of Octoplus software the gateway's on all Octopus devices, Octoplus allows Octopus v3 to create different security zones within the Octopus Network and also alert you when a host gets through and connects to the Octopus network allowing you to block all the gateway's on that device. Another great feature is the ability to add new gateway's to the network, this is done by simply clicking the new gateway icon and providing the IP address of the gateway you want to add to Octoplus v3, v3 can also add gateway's to any gateway defined within the network. Octoplus v3 also allows you to start and stop Octopus devices and even reset them if required. Octoplus v3 allows you to change the host name of all Octopus devices and allows you to define a certificate for each device, if required. Some Octopus users have reported that some of their Octopus devices start spinning wildly when logging into Octopus v3 for the first time. Octoplus v3 allows you to define access rights for all Octopus users and you can even define different levels of access for the same user. Octoplus v3 supports multiple firewall rules, these are fine grained rules that allow you to define a custom action based on the conditions you define. For example you can easily tell Octoplus v3 to automatically block the gateway's on all Octopus devices if there is a breach of network security. There is also a fully integrated Access Lists, these allow you to define a custom set of firewall rules to define
