May 10, 2020 - Usability is our strongest weapon. Setting up rendering is really as easy as clicking "Render". Most new users will learn Corona in just one day, and . 3d will become their home render. Corona allows you to create stunning images, but requires knowledge and time to create the perfect result. If you're in the same position as me, you'd probably like to find a simple program where you can easily create an image without having to learn tons of functions. Today I will show you how to create 2D images with Corona Renderer. First we need to set up the Corona Renderer.
