
Mbox 2 Mini Driver Windows 7 ^HOT^

[Download](#)

hi, ive installed the mid driver on a computer running windows 7 and trying to get my mbox to work in pro tools. im using a musicmate ip7000 and the midi driver is installed but i cant get the midi to work in pro tools. any ideas please. thanks thanks, i will try to find more info about this problem. i have been reading a lot about problems with this mid driver on windows 7. i have installed the plug-in on my system on windows 7 too but i don't have any luck with pro tools. hi, i installed the mid driver in my system on windows 7 but i don't have any luck with pro tools, i mean i can't hear anything coming out of my mbox2 and i don't have any of the pro tools installation discs, anyway i tried to change my usb port and i don't have any luck with this either. any help would be appreciated i have followed the suggested procedures for installing the driver on my

system. however, after installing the driver, my system still cannot access the driver. i still get the error message "cannot locate the file specified." i have no idea why this would happen. i am using windows 7 and the driver is installed on the system. the printer setup utility still detects the printer and all the drivers are installed successfully. hi, i have installed the mid driver and the usb driver on windows 7, however i have still got the same message on my system "cannot locate the file specified" which seems to be that the usb driver cannot access the mid driver, i have tried to change my usb port but still the same error, i have also tried uninstalling and reinstalling the mid driver and the usb driver but this did not work either, any ideas?
