## **Native Instruments: Kontakt 5 Factory Library (KONTAKT, NICNT**

The Kontakt 5 Factory library contains the basic and advanced pianos found in many other synthesizers. As expected, the 24 factory presets have a factory-type sound, but can easily be customized to fit your creative design. Well, the OutRun Kontakt 5 library is the first free NI Library. It is made with the samples from the old arcade game OutRun and OutRun 2. Both games are well known classics of the early 90s. The sound in the OutRun was rather unsuccessful, but I think the OutRun 2 sounds better. It has a more organic feel and is rather mellow. Here is Wolfenstein free Kontakt 5 factory library. Its main purpose is to showcase how easy it is to create lots of great sounding pianos from the sounds that come with Kontakt 5. It includes demos that you can try out, but also a quick piano & synth overview in the description. If you want to create some great sounding pianos from scratch, this library is definitely worth trying out. Here are some Kontakt 5 Factory pianos. These samples are great for very easy sound design. But they can make some amazing sounds. I especially like this set because the samples are from The Beatles songs. The Kontakt 5 Factory Library contains some great sounding drums from Afro by Audion. They are sampled from the game Super Stardust HD. The sounds are great for the drum kits, and they are accompanied by complete UI elements. The Kontakt 5 Factory Library contains the Kontakt version of Distorti. It contains mainly kick, snare, and on top: hi hats. Try them and see if the engine works for your kind of production.
