
Open Source Barcode Label Printing Software [BETTER]

GTLogix offers a specific barcode generation software, which supports 1D/2D barcodes for labeling print applications. It provides the ability to create custom printed labels, barcode labels, loyalty program labels, serialization labels, and industrial labels. The GTLogix barcode reading software is a robust software application for scanning barcodes. The software has web-based or standalone versions, depending on your needs. The scanner features text boxes, barcode descriptions, and clear icons for a simple operation, with advanced features, such as location, size, rotation, and the ability to customize labels. The barcode reading software lets you produce and store barcode information in the XML format, and also supports customizing customized barcode information into a variety of different barcode formats. The barcode reading application is compatible with different Windows operating systems, such as XP, Vista, 7, 8 and 10, and also supports iOS and Android mobile applications. OpenSource BIL is a high quality and cost effective open source barcode generator. The barcode library provides 1D, 2D and also QR codes for application and systems development. Barcode generators generate barcode labels for a wide variety of application and uses, particularly for security systems, shipping, printing, asset tracking, logging, healthcare, or business-to-business applications. The software is easy to use, intuitive, and fully supports the latest printer and barcode standards. The library supports text, color, design, and logos. OpenSource BIL can be used to create individual print labels, websites, and mobile applications. The barcode generator library features an advanced layout and positioning system. The barcode library also supports 1D, 2D, QR codes, and customized barcodes. Additionally, the tools incorporate the OpenOffice, XML, OpenDocument, and PDF document writing system.
