anatomia.pdf. most of the vessels of the this region are of osseous
origin, as the superior maxillary artery, the lateral palpebral artery, the
superior labial artery. authors such as gerard (1912) and orts llorca
(1964) describe that the sympathetic nerve is formed by the thoracic
nerve branches and sacral plexus. they mention that the thoracic
nerve roots are formed by the anterior column of the first thoracic
vertebra, the spinous process of the second thoracic vertebra, the
spinous process of the third thoracic vertebra, the spinous process of
the fourth thoracic vertebra, the lamina of the fifth thoracic vertebra,
the spinous process of the sixth thoracic vertebra, the spinous process
of the seventh thoracic vertebra, the spinous process of the eighth
thoracic vertebra, and the spinous process of the ninth thoracic
vertebra. they also mention that the sacral plexus is formed by the
lumbar nerve roots and are derived from the lumbar spinal marrow on
the side column of the sacral vertebrae. they also relate that the sacral
plexus is formed by the n. intercostales. pdf. sections. abstract;
introduction; materials and methods. as layers of connective tissue
which form compartments (orts llorca, 1986;. 42253; 62223; 81617.
lockhart r, hamilton g. anatomia humana. panamericana 1965. p.

589:91. Orts Llorca f. editorial medica. This great variability about the origin of the major splanchnic nerve, makes of him a reason for many discussions and divergences. Besides Gardner's description, other authors say that the nerve may be originated by T4 to T10 (Lockhart), T5 to T9 (Gray, 1988; Snell), T5 to T9 (Grant; Moore; Woodburne), from T6 to T9 (Gerard; Orts-Llorca; Rouvire, 1943) and from T7 to T9 (Latarjet, 1993). On the present study, we were able to notice that in 4 cases, the nerve originated as Gray and Snell described, having its origin from the ganglions T5 a T9.
