Players take control of Knight characters that function much like the heroes of League of Legends and Heroes of Newerth. Each hero has a distinct style of play and combat style, and they can be purchased with in-game currency. The game contains 16 classes with 6 different variations of each. Players can also purchase cosmetics for their characters that include skins, voice lines and even mission and map skins. As one might expect, the game features an atmosphere of science fiction, and much of the game is set in a space-time continuum, relating to the attributes of the heroes during the current match.

Diabetes and adverse drug reactions in the elderly. Diabetes mellitus is a disease of older individuals. Recent data suggest that many adverse drug reactions (ADRs) occur more frequently in older individuals than in younger patients. It is conceivable that this is due to changes in renal clearance in the elderly, and possibly also because older individuals have impaired hepatic clearance. Older individuals with diabetes may be at higher risk for specific ADRs due to the effects of their underlying disease on drug metabolism. Increased awareness of ADR risk in the elderly will lead to more meticulous prescribing and improved patient outcomes.

on the measure of racial discrimination. - 17 -
04-17-00160-CR retaliation, and retaliation for opposing employment discrimination. In the instant case, appellant never complained about racial discrimination in her employment. Instead, she complained of being mismanaged, treated differently, and discriminated against by her manager, Mr. Harrell, and the lack of managerial guidance. Appellant testified to the effect that she had complained to Mr. Harrell that she had been mistreated and that Mr. Harrell responded "My, Lord, the young women's Department is going to bring this department down", i.e., he was going to look for someone to blame for his own incompetence. Regardless of the facts of this case, this does not rise to the level of employer harassment or discrimination on the basis of race, color, or national origin. The trial court did not err by denying appellant's requested instructions on retaliation.
