
Roland Versaworks 48 [WORK] Free 32

Download

If you're looking for a fast and dependable cutting machine that makes easy work of intricate, curved cut jobs, the Roland VersaCMM 24 is the perfect partner. Offering a 24" x 36" cutting table, the VersaCMM 24 will cut all types of paper, from low to high quality and even thick plastic, foam, wood, metal and fiberglass. The low-vibration and eco-sol inks will allow you to work for long periods of time without tiring your hands or eyes. The Roland SolJet Pro 4 XR-640 is a wide-format inkjet printer with a combination of a continuous-sheet print and a die-cut function. It can automatically print and contour kiss / die cut printed graphics all within the same device. By eliminating the need to reload and reposition graphics, this integrated printer/cutter saves valuable operator time and effort. For cutting laminated graphics, the Quadralign four-point optical registration system automatically realigns the cutting path and compensates for media skew and distortion. The Pro 4 can also be used as a stand-alone vinyl cutter. VersaWorks version 4.8 is a full-featured, easy-to-use RIP software package developed exclusively for the company's wide-format inkjet printers and printer/cutters. The new VersaWorks version will ship with all new Roland models and is available to existing Roland inkjet customers free of charge through an Internet connection using the RolandNET service. The Roland Versaworks 48 is the world's first web-ready, wide format RIP designed to work natively with next-generation WordPress. It offers a host of features designed to make it easier to edit graphics in WordPress and to print them easily, and even includes a few extra tools for protecting and transforming your graphic design. The features of the Versaworks 48 include: Automatic registration that lets you create registration marks and adjust registration points with the click of a button. Specify and adjust the size and position of all part files in one easy step. Adjust the position and size of data in one easy step. Create and embed logos, watermarks and image file stamps to protect your content and branding. Edit your images in the user interface. Print background colors on the fly. Save, remove, merge and delete colors, and generate or modify advanced spot colors. Scale images up or down in the RIP. Adjust the image size to fit a wide format paper within an exact margin box. Automatically trim, crop and add lines to the print path. Apply watermark effects to your art and add metatags, including text, author and text style.
