if you decide to subscribe to spotify, you actually are provided loads of subscription plans to choose from: individual plan(for individuals), duo plan(2 accounts), family plan(6 accounts), and student discount(\$4.99/month). if you are a college student, then the student discount is a nice choice. for other people, my suggestion is the family plan, you can share the \$15 with other 5 people so that you can only pay for a little for the subscription and enjoy the same service. in all other cases, you'll spend the money and wait until the trial period ends. but if you choose a paid plan from the start, you could pay for spotify premium and get a free premium account as well. we're here to show you how to do it, and we've got a demonstration of this below. not only is this one of the best ways to try spotify premium for free, but it will enable you to download music later as well. to claim the current promotion, it's easy. you go to "my music" in the app and find the trial start or notice. then click the "get started for free" button. the next time you start the app, you'll see that the trial is over and that you can pick your spotify premium subscription plan. when you get the free trial, you'll get 60 days free of spotify premium. however, we had to do a little more work to get the most of it. first, we logged in to my email from the application using the account panel. then we selected 'premium for free' and checked the spotify premium codes "free plan codes." in my case, i got a 100% discount to try spotify premium for 30 days for free. gift cards are another free method for getting a paid trial. but they aren't as profitable as they used to be. for example, the current rate of \$20 gift cards is far from the highest in the past, though some new ones come out daily. paypal has its own free trial service where you get a 30-day free trial with just your primary account. it's the best way to find out if you want to use it for spotify and if you can use it for spotify. 5ec8ef588b
