et-3850 delivers some  
really high-quality prints.  
its unique supertank  
system makes a lot of  
sense for an inkjet, as it  
allows you to produce  
extremely high yields  
while using few ink  
cartridges, which keep the

---

cost-per-print extremely low. it has a built-in flatbed scanner, which is great for scanning in document pages and other items. it also has a fast-dial usb port to easily connect to your computer, which makes it a great choice for home or office use. the epson et-3850 has an exceptional ink system. rather than using traditional cartridges, it

---

has four refillable ink tanks, which you refill using ink bottles. thanks to this system, this printer yields thousands of black and color pages before you need to replace the ink. you can easily see the ink levels from the front of the printer. however, its important to note that this printer doesnt have an ink level sensor, so it doesnt know the exact ink levels

---

left. instead, it monitors ink usage internally to provide an estimate of when the ink levels run low, which means you'll have to keep an eye on your ink levels and manually reset the printer settings when you choose to refill the tanks. you shouldn't let the ink levels run too low, as this could introduce air bubbles into the print tubes and
