Lightroom is often cited as the industry standard for image adjustments. It ships with most new cameras and includes all the major nonlinear tools needed for retouching and image editing. However, Lightroom is not as easy for beginners to use. While other apps have similar tools, the

collection makes it easy to store and manage these tools, somewhat mitigating its learning curve. Photoshop's 3D tools will continue to work, just not in the same way. You will still be able to preview 3D models from the 3D Warehouse. And when you import 3D files into Photoshop, you will be able to work with them. But you won't be able to change them from within Photoshop; you have to create a new document instead. To ensure that your 3D files make it into the 3D Warehouse, there will be an additional graduation requirement for 3D files in our gallery. 3D models that have been exported from 3ds Max containing a '.max' file extension will no longer be accepted. 3ds Max 2015 users can no longer export 3D files with that extension to the 3D Warehouse. The system size requirement has been increased from 4GB to 8GB for Photoshop Camera Raw apps. This change will be reflected in updates of the Authoring and Developing plugins at Adobe.com. For CS6, the 9-patch system size requirement has been increased from 2MB to 8MB. The new video program offers filters and graphics tools that allow for even more creative expression and bring 8K resolution to a broad new audience. Adobe Photoshop has long been viewed as the go-to platform for video editing, but with new tools and the direction Photoshop is moving with AI, Adobe is trying to reignite that passion. The 8K video functionality was first announced at the Adobe Max conference in September. With Adobe Photoshop, your creative projects find their way to the fast growing cloud, thanks to a year of updates that keep the app more than ever connected to the web. And with integration with Adobe Share, you can easily work in Photoshop and then share your work using a browser, mobile, or even a projector with multiple screens!
