This change will apply to PS Paint, which is part of the current Creative Cloud package released in September 2018. The direct selection, direct history, and the direct path tools have been marked as deprecated in the latest version of Photoshop. This step is part of the roadmap to make the panels in Photoshop more powerful and efficient. These tools will still be around and users will be able to find the path tool for PS CC 2019 and Photoshop CC 2020. In addition, Photoshop Elements will no longer be directly accessible through the Photoshop menu. This is, however, available through a new Creative Cloud dedicated menu. Finally, the strange, awkward, and complex Option+Tab shortcut will be removed completely. Now, Photoshop will only have keyboard shortcuts. Adobe has announced that a new tools, Effects Library, will be available for CC 2019. It includes, SketchBook Pro and Rapid Mask. SketchBook Pro is a brand-new drawing app in Photoshop, while Rapid Mask is a tool for easily editing transparency and area without loss of quality. You can find out more information about these tools in the following link: **Hands-on: Create and edit visual effects**. In addition, there are a number of new additions to Photoshop's UI. For example, there's a new look for the warping tools, a simpler workspace for the utility panel, and new organizing methods for the tool panels.
